Profile Summary

Artificial Intelligence and Data Science undergraduate with strong foundations in C, C++, Data Structures, and Algorithms. Passionate about problem-solving and software development, with experience in building applications and applying core computer science concepts. Seeking opportunities to contribute to scalable software solutions while enhancing technical expertise.

Skills

- Programming Languages: C, C++, SQL
- Core Competencies: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems, Database Management Systems (DBMS), Computer Networks
- Web Technologies: HTML, CSS, JavaScript
- Frameworks & Tools: Flutter, Firebase, Git
- Databases: MySQL, Firebase Firestore
- Other Skills: Problem Solving, Debugging

Education

Sri Venkateswara College of Engineering , Sriperumbudur
Bachelor of Technology in Artificial Intelligence and Data Science

September 2023 - May 2027

- CGPA: 8.440

Experience

Machine Learning Intern | OneYes InfoTech Solutions | Chennai

April 2026 – May 2026

Worked with Supervised and Unsupervised Machine Learning techniques such as Linear Regression, Logistic Regression, K-Nearest Neighbors (KNN), Decision Trees, Naive Bayes, and Clustering algorithms.

Projects

- **SMART MENU ORDERING AND RESTAURANT MANAGEMENT SYSTEM | FLUTTER, DART, FIREBASE**

Developed a restaurant automation platform for digital menu ordering, payment processing, and feedback management.

Implemented real-time order tracking and role-based authentication using Firebase services.

Optimized restaurant operations through cloud-based order and menu management.

- **FARMER-TO-BUYER AGRICULTURAL MARKETPLACE | FLUTTER, DART, FIREBASE**

Designed a digital marketplace platform connecting farmers directly with buyers to facilitate agricultural trading.

Integrated crop listing, order management, and transportation tracking to streamline the supply chain.

Reduced dependency on intermediaries by enabling direct farmer-to-buyer transactions through a digital marketplace.

- **3D PHYSICS SIMULATION GAMES | HTML, CSS, THREE.JS**

Built interactive 3D physics simulation games using Three.js to demonstrate gravity, collision, force, and motion dynamics in real time.

Enhanced real-time rendering, animation loops, interactive camera controls, and dynamic scene management for enhanced user experience.
